Mounting

Operation

1. **Switch on:** Momentarily press either brightness button(" " or " ") to turn on the Device.
2. **Power off:** Long press the " " button for 3 seconds to turn off the device.
3. **Brightness adjustment:** There are 12 settings for reticle brightness levels. Use " " or " " to increase or decrease the brightness.
4. **Reticle selection:** Long press the " " button for will cycle between the 3 reticle choices.
5. **Motion Awake:** After turning on the device, if there is no action within 4 minutes, the device enters sleep mode. In sleep mode, shaking can wake up the device, and the reticle is consistent with before sleep.

Maintenance & care

This device is a precision instrument that deserves reasonably cautious care. The following tips are provided to ensure a long product life. The optical lenses are multicoated optical glass. When cleaning the lenses, blow away any dust on the surface, wet the lens with lens cleaner or clean water, then wipe away smudges with lens tissue, soft cotton or a microfiber cloth. Avoid touching the glass surface with dry cloth or tissue paper. Do not use organic solvents such as alcohol or acetone. No special maintenance is needed for the housing surface. Do not try to dismantle the device as the internal parts are specially cleaned and sealed and with an anti-fog treatment. Any such attempt will void the warranty.
